Dover, Delaware 19904

**Subject: Correction to letter dated Oct 23, 2018**

Dear Mr. Fees:

Diamond State Generation Partners, LLC submitted an application for maintenance upgrade to the existing installation at the Red Lion site with the most current generation of Bloom Energy servers.

The covering letter accompanying the application incorrectly states that the servers currently at the site total to 26.8MW. In fact, the servers currently on site total to 27MW.

As correctly noted, the site has 134 Bloom Energy operating fuel cell servers. The error was the result of a computational error. The current installation has a combination of 127 servers rated at 200kW, 6 servers rated at 250kW and one server rated at 100kW, totaling to 27MW.

We regret the error introduced in the cover letter.

Sincerely,

Mark Mesler  
Vice President  
Diamond State Generation Partners, LLC
